Getachew Gebreab is affiliated with Eritrea Institute of Technology and focuses on Business research in Africa.

Abstract

Comparative business strategies in Eritrean regions have garnered interest due to their unique blend of traditional and modern economic practices. The analysis draws from existing literature reviews and secondary data sources without conducting original empirical studies. While acknowledging the importance of traditional economic practices, there is a need for more robust data-driven strategies to enhance agricultural productivity and sustainability. Future research should incorporate quantitative methodologies to provide empirical support for theoretical insights and policy recommendations.

Keywords: *Sub-Saharan, contextualization, institutionalism, indigenous knowledge, comparative economics, regional development, business models*
