Author notes

Mangwakali Chipeta is affiliated with Malawi University of Science and Technology (MUST) and focuses on African Studies research in Africa.

Chizita Kachipira is affiliated with Mzuzu University and focuses on African Studies research in Africa.

Simuza Phiri is affiliated with Department of Advanced Studies, Malawi University of Science and Technology (MUST) and focuses on African Studies research in Africa.

Tshipambo Nyikalopa is affiliated with Department of Interdisciplinary Studies, Malawi University of Science and Technology (MUST) and focuses on African Studies research in Africa.

Abstract

The Sahel region of Malawi faces significant climate variability, impacting livelihoods and human security. A mixed-methods approach combining qualitative interviews with remote sensing data to analyse changes over time. Rural communities are particularly vulnerable to climate shocks, necessitating immediate adaptation measures. Enhanced early warning systems and support for drought-resistant agricultural practices are recommended.

Keywords: Sahelian, Human Security, Climate Variability, Mixed-Methods, Remote Sensing, Livelihoods, Sustainability

ABSTRACT-ONLY PUBLICATION

This is an abstract-only publication. The complete research paper with full methodology, results, discussion, and references is available upon request.
