Abstract

This article explores gender dynamics within African political contexts, focusing on Tunisia as a case study. No empirical data will be presented; the focus is on conceptual development and analysis. The theoretical framework underscores the importance of gender considerations in understanding power dynamics across African political landscapes. Future research should integrate empirical data to validate these theoretical propositions and explore their applicability beyond Tunisia.

Keywords: *African geography, Gender studies, Power dynamics, Political sociology, Feminist theory, Intersectionality, Postcolonialism*
