Ahmed El-Sayed is affiliated with Department of Research, South Valley University and focuses on Business research in Africa.

Abstract

Mobile health clinics (MHCs) have been increasingly implemented in rural communities across Africa to address healthcare disparities. A mixed-methods approach was employed, including surveys and focus group discussions with stakeholders from both countries. The study highlights effective approaches for MHC adoption and acceptance, offering insights for policy-makers and implementers. Policy-makers should prioritise community engagement and partnership-building to enhance MHC success in rural contexts.

Keywords: *African, Senegal, Rural, Mixed-methods, Healthcare, Accessibility, Acceptance*

ABSTRACT-ONLY PUBLICATION

This is an abstract-only publication. The complete research paper with full methodology, results, discussion, and references is available upon request.
