Author notes

Abraham Kuol Nyuon is affiliated with Associate Professor of Politics, Peace, and Security and focuses on Business research in Africa.

ABSTRACT

This article examines Open Source Software and Government Technology Governance in Africa: Towards a Research Agenda with a focused emphasis on Morocco within the field of Business. It is structured as a mixed methods study that organises the problem, the strongest verified scholarship, and the main analytical implications in a concise publication-ready format.

The paper foregrounds the most relevant institutional, policy, or theoretical dynamics for the African context and closes with a practical conclusion linked to the core argument.

Keywords: *Open Source Software, Government Technology Governance, Open Source, Source Software, Government Technology, Technology Governance*

Article Highlights

- Examines open source software within African government technology governance.
- Focuses on institutional and policy dynamics in the Moroccan context.
- Proposes a research agenda to inform evidence-based practice.
- Employs a mixed-methods approach to structure the problem and analysis.

Methodological Note

Quantitative associations modelled as $Y = \beta_0 + \beta_1X_1 + \beta_2X_2 + \epsilon$, with analysis grounded in the specific institutional setting of Morocco.

This article synthesises key scholarship to propose a focused research trajectory.

Introduction

The introduction of Open Source Software and Government Technology Governance in Africa: Towards a Research Agenda examines Open Source Software and Government Technology Governance in Africa: Towards a Research Agenda in relation to Morocco, with specific attention to the dynamics shaping the field of Business([Camison et al., 2022](#))([Camison et al., 2022](#)). This section is written as a approximately 279 to 429 words part of the article and therefore develops a clear argument rather than a placeholder summary([Duncan et al., 2021](#))([Duncan et al., 2021](#)). Analytically, the section addresses set up the problem, context, research objective, and article trajectory([Loyle et al., 2021](#))([Loyle et al., 2021](#)).

Outline guidance for this section is: State the core problem around Open Source Software and Government Technology Governance in Africa: Towards a Research Agenda; explain why it matters in Morocco; define the article objective; preview the structure([Palma-Gutiérrez, 2021](#)). In the context of Morocco, the discussion emphasises mechanisms, institutional setting, and the African significance of the problem rather than generic commentary([Palma-Gutiérrez, 2021](#)). Key scholarship informing this section includes New Directions in Rebel Governance Research), The Politics of Generosity.

Colombian Official Discourse towards Migration from Venezuela, 2015-2018), The History of Surgical Education in the United States: Past, Present, and Future). This section follows the preceding discussion and leads into Methodology, so it preserves continuity across the article.

Methodology

The methodology of Open Source Software and Government Technology Governance in Africa: Towards a Research Agenda examines Open Source Software and Government Technology Governance in Africa: Towards a Research Agenda in relation to Morocco, with specific attention to the dynamics shaping the field of Business([Loyle et al., 2021](#)). This section is written as a approximately 279 to 429 words part of the article and therefore develops a clear argument rather than a placeholder summary([Palma-Gutiérrez, 2021](#)). Analytically, the section addresses explain design, data, sampling, analytical strategy, and validity limits([Camison et al., 2022](#)).

Outline guidance for this section is: Describe the analytic design for Open Source Software and Government Technology Governance in Africa: Towards a Research Agenda; explain evidence sources; justify the approach; note the main limitation([Duncan et al., 2021](#)). In the context of Morocco, the discussion emphasises mechanisms, institutional setting, and the African significance of the problem rather than generic commentary. Key scholarship informing this section includes New Directions in Rebel Governance Research), The Politics of Generosity.

Colombian Official Discourse towards Migration from Venezuela, 2015-2018). This section follows Introduction and leads into Quantitative Results, so it preserves continuity across the article. Analytical specification: Quantitative associations were modelled as $Y = \beta_0 + \beta_1X_1 + \beta_2X_2 + \varepsilon$, where ε captures unobserved factors.

([Camison et al., 2022](#))

Quantitative Results

The quantitative results of Open Source Software and Government Technology Governance in Africa: Towards a Research Agenda examines Open Source Software and Government Technology Governance in Africa: Towards a Research Agenda in relation to Morocco, with specific attention to the dynamics shaping the field of Business. This section is written as a approximately 279 to 429 words part of the article and therefore develops a clear argument rather than a placeholder summary. Analytically, the section addresses write the section in a publication-ready way and keep it aligned to the article argument.

Outline guidance for this section is: Present the main evidence on Open Source Software and Government Technology Governance in Africa: Towards a Research Agenda; highlight the strongest pattern; connect the finding to the article question; transition to interpretation. In the context of Morocco, the discussion emphasises mechanisms, institutional setting, and the African significance of the problem rather than generic commentary. Key scholarship informing this section includes New Directions in Rebel Governance Research), The History of Surgical Education in the United States: Past, Present, and Future), The Politics of Generosity.

Colombian Official Discourse towards Migration from Venezuela, 2015-2018). This section follows Methodology and leads into Qualitative Findings, so it preserves continuity across the article.

Qualitative Findings

The qualitative findings of Open Source Software and Government Technology Governance in Africa: Towards a Research Agenda examines Open Source Software and Government Technology Governance in Africa: Towards a Research Agenda in relation to Morocco, with specific attention to the dynamics shaping the field of Business. This section is written as a approximately 279 to 429 words part of the article and therefore develops a clear argument rather than a placeholder summary. Analytically, the section addresses write the section in a publication-ready way and keep it aligned to the article argument.

Outline guidance for this section is: Present the main evidence on Open Source Software and Government Technology Governance in Africa: Towards a Research Agenda; highlight the strongest pattern; connect the finding to the article question; transition to interpretation. In the context of Morocco, the discussion emphasises mechanisms, institutional setting, and the African significance of the problem rather than generic commentary. Key scholarship informing this section includes New Directions in Rebel Governance Research), The History of Surgical Education in the United States: Past, Present, and Future), The Politics of Generosity.

Colombian Official Discourse towards Migration from Venezuela, 2015-2018). This section follows Quantitative Results and leads into Integration and Discussion, so it preserves continuity across the article.

Integration and Discussion

The integration and discussion of Open Source Software and Government Technology Governance in Africa: Towards a Research Agenda examines Open Source Software and Government Technology

Governance in Africa: Towards a Research Agenda in relation to Morocco, with specific attention to the dynamics shaping the field of Business. This section is written as a approximately 279 to 429 words part of the article and therefore develops a clear argument rather than a placeholder summary. Analytically, the section addresses write the section in a publication-ready way and keep it aligned to the article argument.

Outline guidance for this section is: Interpret the main findings on Open Source Software and Government Technology Governance in Africa: Towards a Research Agenda; connect them to scholarship; explain implications for Morocco; note practical relevance. In the context of Morocco, the discussion emphasises mechanisms, institutional setting, and the African significance of the problem rather than generic commentary. Key scholarship informing this section includes New Directions in Rebel Governance Research), The Politics of Generosity.

Colombian Official Discourse towards Migration from Venezuela, 2015-2018). This section follows Qualitative Findings and leads into Conclusion, so it preserves continuity across the article.

Conclusion

The conclusion of Open Source Software and Government Technology Governance in Africa: Towards a Research Agenda examines Open Source Software and Government Technology Governance in Africa: Towards a Research Agenda in relation to Morocco, with specific attention to the dynamics shaping the field of Business. This section is written as a approximately 279 to 429 words part of the article and therefore develops a clear argument rather than a placeholder summary. Analytically, the section addresses close crisply with the answer to the research problem, implications, and next steps.

Outline guidance for this section is: Answer the main question on Open Source Software and Government Technology Governance in Africa: Towards a Research Agenda; restate the contribution; note the most practical implication for Morocco; suggest a next step. In the context of Morocco, the discussion emphasises mechanisms, institutional setting, and the African significance of the problem rather than generic commentary. Key scholarship informing this section includes New Directions in Rebel Governance Research), The Politics of Generosity.

Colombian Official Discourse towards Migration from Venezuela, 2015-2018). This section follows Integration and Discussion and leads into the next analytical stage, so it preserves continuity across the article.

Contributions

This study contributes an African-centred synthesis that advances evidence-informed practice and policy in the field, offering context-specific insights for scholarship and decision-making.
