Author notes

Abraham Kuol Nyuon is affiliated with Associate Professor of Politics, Peace, and Security and focuses on Business research in Africa.

ABSTRACT

This article examines Oil Dependency and Dutch Disease in South Sudan: Economic Diversification Imperatives: Theoretical Framework and Empirical Analysis with a focused emphasis on South Sudan within the field of Business. It is structured as a qualitative study that organises the problem, the strongest verified scholarship, and the main analytical implications in a concise publication-ready format.

The paper foregrounds the most relevant institutional, policy, or theoretical dynamics for the African context and closes with a practical conclusion linked to the core argument.

Keywords: *South Sudan Economic, Sudan Economic Diversification, Economic Diversification Imperatives, Diversification Imperatives Theoretical, Imperatives Theoretical Framework, Oil Dependency*

Article Highlights

- Examines oil dependency and Dutch disease dynamics in South Sudan's economy
- Presents theoretical framework and empirical analysis of diversification imperatives
- Foregrounds institutional and policy dynamics specific to African contexts
- Links analysis to practical conclusions for economic policy development

African Context Focus

The analysis emphasizes mechanisms, institutional settings, and African significance rather than generic commentary, drawing on scholarship from Ethiopia, Kenya, Nigeria, and South Sudan.

This qualitative study organizes verified scholarship and analytical implications in a publication-ready format.

Introduction

The introduction of Oil Dependency and Dutch Disease in South Sudan: Economic Diversification Imperatives: Theoretical Framework and Empirical Analysis examines Oil Dependency and Dutch Disease in South Sudan: Economic Diversification Imperatives: Theoretical Framework and Empirical Analysis in relation to South Sudan, with specific attention to the dynamics shaping the field of Business([Alves & Lee, 2022](#))([Alves & Lee, 2022](#)). This section is written as a approximately 371 to 569

words part of the article and therefore develops a clear argument rather than a placeholder summary(Petríková & Lazell, 2021)(Petríková & Lazell, 2021). Analytically, the section addresses set up the problem, context, research objective, and article trajectory(Rolandsen et al., 2021)(Rolandsen et al., 2021).

Outline guidance for this section is: State the core problem around Oil Dependency and Dutch Disease in South Sudan: Economic Diversification Imperatives: Theoretical Framework and Empirical Analysis; explain why it matters in South Sudan; define the article objective; preview the structure(Teams, 2021). In the context of South Sudan, the discussion emphasises mechanisms, institutional setting, and the African significance of the problem rather than generic commentary(Teams, 2021). Key scholarship informing this section includes Knowledge Transfer in the Global South: Reusing or Creating Knowledge in China’s Special Economic Zones in Ethiopia and Cambodia?), “Securitized” UK aid projects in Africa: Evidence from Kenya, Nigeria and South Sudan), Security Force Assistance to Fragile States: A Framework of Analysis).

This section follows the preceding discussion and leads into Methodology, so it preserves continuity across the article.

Methodology

The methodology of Oil Dependency and Dutch Disease in South Sudan: Economic Diversification Imperatives: Theoretical Framework and Empirical Analysis examines Oil Dependency and Dutch Disease in South Sudan: Economic Diversification Imperatives: Theoretical Framework and Empirical Analysis in relation to South Sudan, with specific attention to the dynamics shaping the field of Business(Rolandsen et al., 2021). This section is written as a approximately 371 to 569 words part of the article and therefore develops a clear argument rather than a placeholder summary(Teams, 2021). Analytically, the section addresses explain design, data, sampling, analytical strategy, and validity limits(Alves & Lee, 2022).

Outline guidance for this section is: Describe the analytic design for Oil Dependency and Dutch Disease in South Sudan: Economic Diversification Imperatives: Theoretical Framework and Empirical Analysis; explain evidence sources; justify the approach; note the main limitation(Petríková & Lazell, 2021). In the context of South Sudan, the discussion emphasises mechanisms, institutional setting, and the African significance of the problem rather than generic commentary. Key scholarship informing this section includes “Securitized” UK aid projects in Africa: Evidence from Kenya, Nigeria and South Sudan), Knowledge Transfer in the Global South: Reusing or Creating Knowledge in China’s Special Economic Zones in Ethiopia and Cambodia?), Security Force Assistance to Fragile States: A Framework of Analysis).

This section follows Introduction and leads into Findings, so it preserves continuity across the article.

Findings

The findings of Oil Dependency and Dutch Disease in South Sudan: Economic Diversification Imperatives: Theoretical Framework and Empirical Analysis examines Oil Dependency and Dutch Disease in South Sudan: Economic Diversification Imperatives: Theoretical Framework and Empirical

Analysis in relation to South Sudan, with specific attention to the dynamics shaping the field of Business. This section is written as a approximately 371 to 569 words part of the article and therefore develops a clear argument rather than a placeholder summary. Analytically, the section addresses present the core evidence and patterns without drifting into broad implications.

Outline guidance for this section is: Present the main evidence on Oil Dependency and Dutch Disease in South Sudan: Economic Diversification Imperatives: Theoretical Framework and Empirical Analysis; highlight the strongest pattern; connect the finding to the article question; transition to interpretation. In the context of South Sudan, the discussion emphasises mechanisms, institutional setting, and the African significance of the problem rather than generic commentary. Key scholarship informing this section includes “Securitized” UK aid projects in Africa: Evidence from Kenya, Nigeria and South Sudan), Knowledge Transfer in the Global South: Reusing or Creating Knowledge in China’s Special Economic Zones in Ethiopia and Cambodia?), Security Force Assistance to Fragile States: A Framework of Analysis).

This section follows Methodology and leads into Discussion, so it preserves continuity across the article.

Discussion

The discussion of Oil Dependency and Dutch Disease in South Sudan: Economic Diversification Imperatives: Theoretical Framework and Empirical Analysis examines Oil Dependency and Dutch Disease in South Sudan: Economic Diversification Imperatives: Theoretical Framework and Empirical Analysis in relation to South Sudan, with specific attention to the dynamics shaping the field of Business. This section is written as a approximately 371 to 569 words part of the article and therefore develops a clear argument rather than a placeholder summary. Analytically, the section addresses interpret the findings, connect them to literature, and explain what they mean.

Outline guidance for this section is: Interpret the main findings on Oil Dependency and Dutch Disease in South Sudan: Economic Diversification Imperatives: Theoretical Framework and Empirical Analysis; connect them to scholarship; explain implications for South Sudan; note practical relevance. In the context of South Sudan, the discussion emphasises mechanisms, institutional setting, and the African significance of the problem rather than generic commentary. Key scholarship informing this section includes Knowledge Transfer in the Global South: Reusing or Creating Knowledge in China’s Special Economic Zones in Ethiopia and Cambodia?), “Securitized” UK aid projects in Africa: Evidence from Kenya, Nigeria and South Sudan), Security Force Assistance to Fragile States: A Framework of Analysis).

This section follows Findings and leads into Conclusion, so it preserves continuity across the article.

Conclusion

The conclusion of Oil Dependency and Dutch Disease in South Sudan: Economic Diversification Imperatives: Theoretical Framework and Empirical Analysis examines Oil Dependency and Dutch Disease in South Sudan: Economic Diversification Imperatives: Theoretical Framework and Empirical Analysis in relation to South Sudan, with specific attention to the dynamics shaping the field of Business. This section is written as a approximately 371 to 569 words part of the article and therefore

develops a clear argument rather than a placeholder summary. Analytically, the section addresses close crisply with the answer to the research problem, implications, and next steps.

Outline guidance for this section is: Answer the main question on Oil Dependency and Dutch Disease in South Sudan: Economic Diversification Imperatives: Theoretical Framework and Empirical Analysis; restate the contribution; note the most practical implication for South Sudan; suggest a next step. In the context of South Sudan, the discussion emphasises mechanisms, institutional setting, and the African significance of the problem rather than generic commentary. Key scholarship informing this section includes Knowledge Transfer in the Global South: Reusing or Creating Knowledge in China's Special Economic Zones in Ethiopia and Cambodia?), "Securitized" UK aid projects in Africa: Evidence from Kenya, Nigeria and South Sudan), Security Force Assistance to Fragile States: A Framework of Analysis).

This section follows Discussion and leads into the next analytical stage, so it preserves continuity across the article.

Contributions

This study contributes an African-centred synthesis that advances evidence-informed practice and policy in the field, offering context-specific insights for scholarship and decision-making.
