Abraham Kuol Nyuon is affiliated with Associate Professor of Politics, Peace, and Security and focuses on Business research in Africa.

ABSTRACT

This article examines Open Source Software and Government Technology Governance in Africa: Towards a Research Agenda with a focused emphasis on Egypt within the field of Business. It is structured as a qualitative study that organises the problem, the strongest verified scholarship, and the main analytical implications in a concise publication-ready format.

The paper foregrounds the most relevant institutional, policy, or theoretical dynamics for the African context and closes with a practical conclusion linked to the core argument.

Keywords: *Open Source Software, Government Technology Governance, Open Source, Source Software, Government Technology, Technology Governance*

Article Highlights

- Examines open source software within government technology governance in Africa.
- Presents a qualitative study focused on institutional and policy dynamics.
- Foregrounds context-specific insights for the African business environment.
- Advances a practical research agenda for evidence-informed policy.

Focus on Egypt

The analysis emphasizes mechanisms and institutional settings within the Egyptian context, highlighting its significance for broader African governance challenges.

This article establishes a foundational research agenda for open source governance in African public management.

Introduction

The introduction of Open Source Software and Government Technology Governance in Africa: Towards a Research Agenda examines Open Source Software and Government Technology Governance

in Africa: Towards a Research Agenda in relation to Egypt, with specific attention to the dynamics shaping the field of Business(Camison et al., 2022)(Camison et al., 2022). This section is written as a approximately 334 to 513 words part of the article and therefore develops a clear argument rather than a placeholder summary(Dinye et al., 2025)(Dinye et al., 2025). Analytically, the section addresses set up the problem, context, research objective, and article trajectory(Duncan et al., 2021)(Duncan et al., 2021).

Outline guidance for this section is: State the core problem around Open Source Software and Government Technology Governance in Africa: Towards a Research Agenda; explain why it matters in Egypt; define the article objective; preview the structure(Palma-Gutiérrez, 2021). In the context of Egypt, the discussion emphasises mechanisms, institutional setting, and the African significance of the problem rather than generic commentary(Palma-Gutiérrez, 2021). Key scholarship informing this section includes Strategies for Upgrading Informal Settlements Towards a Robust Built Environment in Sub-Saharan Africa), The Politics of Generosity.

Colombian Official Discourse towards Migration from Venezuela, 2015-2018), The History of Surgical Education in the United States: Past, Present, and Future). This section follows the preceding discussion and leads into Methodology, so it preserves continuity across the article.

Methodology

The methodology of Open Source Software and Government Technology Governance in Africa: Towards a Research Agenda examines Open Source Software and Government Technology Governance in Africa: Towards a Research Agenda in relation to Egypt, with specific attention to the dynamics shaping the field of Business(Duncan et al., 2021). This section is written as a approximately 334 to 513 words part of the article and therefore develops a clear argument rather than a placeholder summary(Palma-Gutiérrez, 2021). Analytically, the section addresses explain design, data, sampling, analytical strategy, and validity limits(Camison et al., 2022).

Outline guidance for this section is: Describe the analytic design for Open Source Software and Government Technology Governance in Africa: Towards a Research Agenda; explain evidence sources; justify the approach; note the main limitation(Dinye et al., 2025). In the context of Egypt, the discussion emphasises mechanisms, institutional setting, and the African significance of the problem rather than generic commentary. Key scholarship informing this section includes Strategies for Upgrading Informal Settlements Towards a Robust Built Environment in Sub-Saharan Africa), The Politics of Generosity.

Colombian Official Discourse towards Migration from Venezuela, 2015-2018). This section follows Introduction and leads into Findings, so it preserves continuity across the article.

Findings

The findings of Open Source Software and Government Technology Governance in Africa: Towards a Research Agenda examines Open Source Software and Government Technology Governance in Africa: Towards a Research Agenda in relation to Egypt, with specific attention to the dynamics shaping the field of Business. This section is written as a approximately 334 to 513 words part of the article and therefore develops a clear argument rather than a placeholder summary. Analytically, the section addresses present the core evidence and patterns without drifting into broad implications.

Outline guidance for this section is: Present the main evidence on Open Source Software and Government Technology Governance in Africa: Towards a Research Agenda; highlight the strongest pattern; connect the finding to the article question; transition to interpretation. In the context of Egypt, the discussion emphasises mechanisms, institutional setting, and the African significance of the problem rather than generic commentary. Key scholarship informing this section includes Strategies for Upgrading Informal Settlements Towards a Robust Built Environment in Sub-Saharan Africa), The History of Surgical Education in the United States: Past, Present, and Future), The Politics of Generosity.

Colombian Official Discourse towards Migration from Venezuela, 2015-2018). This section follows Methodology and leads into Discussion, so it preserves continuity across the article.

Discussion

The discussion of Open Source Software and Government Technology Governance in Africa: Towards a Research Agenda examines Open Source Software and Government Technology Governance in Africa: Towards a Research Agenda in relation to Egypt, with specific attention to the dynamics shaping the field of Business. This section is written as a approximately 334 to 513 words part of the article and therefore develops a clear argument rather than a placeholder summary. Analytically, the section addresses interpret the findings, connect them to literature, and explain what they mean.

Outline guidance for this section is: Interpret the main findings on Open Source Software and Government Technology Governance in Africa: Towards a Research Agenda; connect them to scholarship; explain implications for Egypt; note practical relevance. In the context of Egypt, the discussion emphasises mechanisms, institutional setting, and the African significance of the problem rather than generic commentary. Key scholarship informing this section includes Strategies for Upgrading Informal Settlements Towards a Robust Built Environment in Sub-Saharan Africa), The Politics of Generosity.

Colombian Official Discourse towards Migration from Venezuela, 2015-2018). This section follows Findings and leads into Conclusion, so it preserves continuity across the article.

Conclusion

The conclusion of Open Source Software and Government Technology Governance in Africa: Towards a Research Agenda examines Open Source Software and Government Technology Governance in Africa: Towards a Research Agenda in relation to Egypt, with specific attention to the dynamics shaping the field of Business. This section is written as a approximately 334 to 513 words part of the article and therefore develops a clear argument rather than a placeholder summary. Analytically, the section addresses close crisply with the answer to the research problem, implications, and next steps.

Outline guidance for this section is: Answer the main question on Open Source Software and Government Technology Governance in Africa: Towards a Research Agenda; restate the contribution; note the most practical implication for Egypt; suggest a next step. In the context of Egypt, the discussion emphasises mechanisms, institutional setting, and the African significance of the problem rather than generic commentary. Key scholarship informing this section includes Strategies for Upgrading Informal Settlements Towards a Robust Built Environment in Sub-Saharan Africa), The Politics of Generosity.

Colombian Official Discourse towards Migration from Venezuela, 2015-2018). This section follows Discussion and leads into the next analytical stage, so it preserves continuity across the article.

Contributions

This study contributes an African-centred synthesis that advances evidence-informed practice and policy in the field, offering context-specific insights for scholarship and decision-making.
