Abstract

Business dynamics in Mozambique are influenced by a variety of regional factors, including economic policies, regulatory environments, and cultural norms. No empirical data is included; the theoretical development relies on existing literature and analytical frameworks. Theoretical insights provide a foundational understanding for future empirical studies focused on specific regions within Mozambique. Further research should focus on longitudinal data collection to validate theoretical propositions with real-world business performance metrics.

Keywords: *Sub-Saharan, Mercosur, Institutionalism, Economic Geography, Ethnography, Comparative Analysis, Dependency Theory*

ABSTRACT-ONLY PUBLICATION

This is an abstract-only publication. The complete research paper with full methodology, results, discussion, and references is available upon request.
