## Author notes

*Oumar Diop is affiliated with Institut Pasteur de Dakar and focuses on Psychology research in Africa.*

## Abstract

Comparative psychology studies in African regions have shown significant variability in psychological development across different contexts. The methodology involves synthesizing existing literature, ethnographic studies, and psychometric data from various African regions to develop a comprehensive theoretical model. Theoretical insights derived from the comparative analysis highlight potential areas for future empirical research and policy interventions tailored to diverse African contexts. Researchers should prioritise cross-cultural collaboration and utilise existing datasets more effectively to enhance understanding of psychological phenomena across Africa.

**Keywords:** *African geography, developmental psychology, cross-cultural studies, ethology, psychometrics, qualitative methods, socio-cultural differences*

## ABSTRACT-ONLY PUBLICATION

This is an abstract-only publication. The complete research paper with full methodology, results, discussion, and references is available upon request.
