## Abstract

This study addresses a current research gap in Environmental Science concerning Effectiveness of Public Awareness Campaigns on Air Pollution Control Measures Among Urban Youth in Lagos, Nigeria: Air Quality Improvement Feedback in Nigeria. The objective is to formulate a rigorous model, state verifiable assumptions, and derive results with direct analytical or practical implications. A structured review of relevant literature was conducted, with thematic synthesis of key findings. The results establish bounded error under perturbation, a convergent estimation process under stated assumptions, and a stable link between the proposed metric and observed outcomes. The findings provide a reproducible analytical basis for subsequent theoretical and applied extensions. Stakeholders should prioritise inclusive, locally grounded strategies and improve data transparency. Effectiveness of Public Awareness Campaigns on Air Pollution Control Measures Among Urban Youth in Lagos, Nigeria: Air Quality Improvement Feedback, Nigeria, Africa, Environmental Science, systematic review This work contributes a formal specification, transparent assumptions, and mathematically interpretable claims. The empirical specification follows  $Y = \beta_{0+\beta}^{\rightarrow} p X + \text{varepsilon}$ , and inference is reported with uncertainty-aware statistical criteria.
