Author notes

Nomsa Nkosi is affiliated with Agricultural Research Council (ARC) and focuses on Environmental Science research in Africa.

Siphon Motshaga is affiliated with University of Johannesburg and focuses on Environmental Science research in Africa.

Gcina Ngubane is affiliated with Department of Interdisciplinary Studies, Rhodes University and focuses on Environmental Science research in Africa.

Makgoswe Mogashaba is affiliated with Department of Interdisciplinary Studies, University of Johannesburg and focuses on Environmental Science research in Africa.

Abstract

Climate change litigation has emerged as a critical tool for addressing environmental degradation in South Africa, alongside traditional enforcement mechanisms. A mixed-methods approach involving legal case analysis and stakeholder interviews to assess the effectiveness of climate change litigation in promoting environmental protection. Litigation cases have achieved a

10 million settlement for a local community affected by mining pollution, indicating significant success in achieving

$Y = \beta_{0+\beta} p X + \text{varepsilon}$, inference is reported with uncertainty – aware statistical criteria.

Keywords: Sub-Saharan, Jurisprudence, Environmentalism, Anthropocene, Legalisation, Sustainability, Ecosystems
