## Abstract

Sustainable Development Law in Cape Verde is a critical area of legal discourse that seeks to balance environmental conservation with socio-economic development goals. The analysis relies on secondary data sources including legislative texts, case laws, and scholarly articles published within the last decade. The integration of sustainable development laws has led to notable improvements in environmental protection and socio-economic resilience, although challenges remain in enforcement and public awareness. Further research is recommended to assess the impact of recent legal reforms on real-world outcomes and identify areas for improvement in policy implementation.
