Kizito Habimana is affiliated with African Leadership University (ALU), Kigali and focuses on African Studies research in Africa.

Muhire Karegera is affiliated with Department of Interdisciplinary Studies, University of Rwanda and focuses on African Studies research in Africa.

Niyonzima Nsengimana is affiliated with Department of Advanced Studies, African Leadership University (ALU), Kigali and focuses on African Studies research in Africa.

Tarugamba Katabira is affiliated with University of Rwanda and focuses on African Studies research in Africa.

Abstract

Sustainable farming practices are crucial for maintaining soil health and productivity in mountainous regions like Rwanda's coffee-growing areas. This article employs socio-economic models to analyse existing data on farming practices and their impacts, without empirical research methods. The theoretical framework underscores the importance of farmer education and support systems for sustainable farming practices. Policy makers should invest in extension services that promote sustainable farming techniques among Rwandan coffee farmers.
