Abstract

The Nile Basin is a critical water resource for Malawi, facing increasing water scarcity due to climate change and population growth. A qualitative analysis of existing literature and stakeholder perspectives to identify key conflict drivers and mitigation mechanisms. The theoretical framework emphasizes the importance of equitable resource sharing and adaptive management strategies in mitigating future conflicts. Promote participatory governance models that include all affected stakeholders for sustainable water resource management.

Keywords: *Nile Basin, Malawi, Water Scarcity, Conflict Resolution, Sustainable Development, Stakeholder Analysis, Adaptive Management*
