Abstract

Land reform in East Africa has been a contentious issue, with Nigeria leading efforts to address inequities and promote sustainable development. No empirical data or methods are provided; this piece focuses on theoretical analysis and synthesis of existing literature. Despite initial challenges, Nigeria's land reform initiatives are fostering socio-economic stability by reducing rural poverty and enhancing food security. Further research should focus on long-term impacts and potential policy adjustments to ensure inclusive development outcomes.

Keywords: *Africanization, Decolonial Theory, Land Rights, Marxist Critique, Peasant Studies, Structural Adjustment Programmes, Urban-Rural Dynamics*
