Abstract

Cultural dynamics in migrant communities of Southern Africa are complex and multifaceted, influenced by historical migrations, socio-economic conditions, and cultural diversity. Theoretical synthesis and qualitative analysis of existing literature. A theoretical model for understanding cultural resilience is proposed, emphasising the role of community cohesion and intergenerational transmission of culture. Further empirical research should focus on longitudinal studies to validate these theoretical insights.

Keywords: *Sub-Saharan, diaspora, acculturation, resilience, ethnography, heritage, migration*

ABSTRACT-ONLY PUBLICATION

This is an abstract-only publication. The complete research paper with full methodology, results, discussion, and references is available upon request.
