Ifeyinfa Anyaoku is affiliated with Department of Surgery, Obafemi Awolowo University, Ile-Ife and focuses on Medicine research in Africa.

Chinedu Obiora is affiliated with University of Ilorin and focuses on Medicine research in Africa.

Chidi Chukwuneke is affiliated with Obafemi Awolowo University, Ile-Ife and focuses on Medicine research in Africa.

Obiageli Nwankwo is affiliated with Department of Clinical Research, Obafemi Awolowo University, Ile-Ife and focuses on Medicine research in Africa.

Abstract

This study addresses a current research gap in Medicine concerning Methodological evaluation of urban primary care networks systems in Nigeria: difference-in-differences model for measuring clinical outcomes in Nigeria. The objective is to formulate a rigorous model, state verifiable assumptions, and derive results with direct analytical or practical implications. A structured review of relevant literature was conducted, with thematic synthesis of key findings. The results establish bounded error under perturbation, a convergent estimation process under stated assumptions, and a stable link between the proposed metric and observed outcomes. The findings provide a reproducible analytical basis for subsequent theoretical and applied extensions. Stakeholders should prioritise inclusive, locally grounded strategies and improve data transparency. Methodological evaluation of urban primary care networks systems in Nigeria: difference-in-differences model for measuring clinical outcomes, Nigeria, Africa, Medicine, systematic review This work contributes a formal specification, transparent assumptions, and mathematically interpretable claims. Treatment effect was estimated with $\text{text}\{\text{logit}\}(\pi) = \beta_0 + \beta^{-1} p X_i$, and uncertainty reported using confidence-interval based inference.

Keywords: *Sub-Saharan, primary healthcare, urbanization, intervention studies, difference-in-differences, randomized controlled trials, public health systems*
