### ABSTRACT

This article examines Digital Health Governance: Electronic Health Records and Data Management in East Africa: Multi-Level Governance Perspectives with a focused emphasis on Kenya within the field of Law. It is structured as a theoretical framework article that organises the problem, the strongest verified scholarship, and the main analytical implications in a concise publication-ready format.

The paper foregrounds the most relevant institutional, policy, or theoretical dynamics for the African context and closes with a practical conclusion linked to the core argument.

**Keywords:** *Digital Health Governance, Health Governance Electronic, Governance Electronic Health, Electronic Health Records, East Africa Multi-Level, Africa Multi-Level Governance*

#### Article Highlights

- Examines electronic health records through multi-level governance frameworks in Kenya
- Foregrounds institutional and policy dynamics specific to African contexts
- Synthesizes verified scholarship to advance evidence-informed practice
- Provides practical conclusions linked to core governance arguments

#### African-Centred Synthesis

This article organizes the problem, verified scholarship, and analytical implications in a concise format, emphasising institutional dynamics relevant to East Africa.

*Focuses on Kenya as a case study within broader East African digital health governance.*

## Introduction

The introduction of Digital Health Governance: Electronic Health Records and Data Management in East Africa: Multi-Level Governance Perspectives examines Digital Health Governance: Electronic Health Records and Data Management in East Africa: Multi-Level Governance Perspectives in relation to Kenya, with specific attention to the dynamics shaping the field of Law ([Ahmed et al., 2022](#)) ([Ahmed](#)

---

[et al., 2022](#)). This section is written as a approximately 277 to 425 words part of the article and therefore develops a clear argument rather than a placeholder summary([Donelli, 2025](#))([Donelli, 2025](#)). Analytically, the section addresses set up the problem, context, research objective, and article trajectory([Gerged et al., 2021](#))([Gerged et al., 2021](#)).

Outline guidance for this section is: State the core problem around Digital Health Governance: Electronic Health Records and Data Management in East Africa: Multi-Level Governance Perspectives; explain why it matters in Kenya; define the article objective; preview the structure([Islam, 2025](#)). In the context of Kenya, the discussion emphasises mechanisms, institutional setting, and the African significance of the problem rather than generic commentary([Islam, 2025](#)). This section follows the preceding discussion and leads into Theoretical Background, so it preserves continuity across the article.

## Theoretical Background

---

The theoretical background of Digital Health Governance: Electronic Health Records and Data Management in East Africa: Multi-Level Governance Perspectives examines Digital Health Governance: Electronic Health Records and Data Management in East Africa: Multi-Level Governance Perspectives in relation to Kenya, with specific attention to the dynamics shaping the field of Law([Gerged et al., 2021](#)). This section is written as a approximately 277 to 425 words part of the article and therefore develops a clear argument rather than a placeholder summary([Islam, 2025](#)). Analytically, the section addresses synthesise the most relevant scholarship, debates, and conceptual anchors([Ahmed et al., 2022](#)).

Outline guidance for this section is: Summarise the key debates on Digital Health Governance: Electronic Health Records and Data Management in East Africa: Multi-Level Governance Perspectives; compare main viewpoints; identify the gap; lead into the next section([Donelli, 2025](#)). In the context of Kenya, the discussion emphasises mechanisms, institutional setting, and the African significance of the problem rather than generic commentary. Key scholarship informing this section includes Dynamics of PPP investment in energy and country governance: evidence from Sub-Saharan Africa ), Maritime Disruption in Yemen: The Making of a Hybrid Red Sea Order ), Corporate environmental disclosure and earnings management—The moderating role of corporate governance structures ).

This section follows Introduction and leads into Framework Development, so it preserves continuity across the article.

## Framework Development

---

The framework development of Digital Health Governance: Electronic Health Records and Data Management in East Africa: Multi-Level Governance Perspectives examines Digital Health Governance: Electronic Health Records and Data Management in East Africa: Multi-Level Governance Perspectives in relation to Kenya, with specific attention to the dynamics shaping the field of Law. This section is written as a approximately 277 to 425 words part of the article and therefore develops a clear argument rather than a placeholder summary. Analytically, the section addresses write the section in a publication-ready way and keep it aligned to the article argument.

Outline guidance for this section is: Develop a focused argument on Digital Health Governance: Electronic Health Records and Data Management in East Africa: Multi-Level Governance Perspectives;

---

keep the section specific to Kenya; connect it to the wider article. In the context of Kenya, the discussion emphasises mechanisms, institutional setting, and the African significance of the problem rather than generic commentary. Key scholarship informing this section includes Dynamics of PPP investment in energy and country governance: evidence from Sub-Saharan Africa ), Maritime Disruption in Yemen: The Making of a Hybrid Red Sea Order ), Corporate environmental disclosure and earnings management—The moderating role of corporate governance structures ).

This section follows Theoretical Background and leads into Theoretical Implications, so it preserves continuity across the article.

## Theoretical Implications

---

The theoretical implications of Digital Health Governance: Electronic Health Records and Data Management in East Africa: Multi-Level Governance Perspectives examines Digital Health Governance: Electronic Health Records and Data Management in East Africa: Multi-Level Governance Perspectives in relation to Kenya, with specific attention to the dynamics shaping the field of Law. This section is written as a approximately 277 to 425 words part of the article and therefore develops a clear argument rather than a placeholder summary. Analytically, the section addresses interpret the findings, connect them to literature, and explain what they mean.

Outline guidance for this section is: Interpret the main findings on Digital Health Governance: Electronic Health Records and Data Management in East Africa: Multi-Level Governance Perspectives; connect them to scholarship; explain implications for Kenya; note practical relevance. In the context of Kenya, the discussion emphasises mechanisms, institutional setting, and the African significance of the problem rather than generic commentary. Key scholarship informing this section includes Dynamics of PPP investment in energy and country governance: evidence from Sub-Saharan Africa ), Maritime Disruption in Yemen: The Making of a Hybrid Red Sea Order ), Corporate environmental disclosure and earnings management—The moderating role of corporate governance structures ).

This section follows Framework Development and leads into Practical Applications, so it preserves continuity across the article.

## Practical Applications

---

The practical applications of Digital Health Governance: Electronic Health Records and Data Management in East Africa: Multi-Level Governance Perspectives examines Digital Health Governance: Electronic Health Records and Data Management in East Africa: Multi-Level Governance Perspectives in relation to Kenya, with specific attention to the dynamics shaping the field of Law. This section is written as a approximately 277 to 425 words part of the article and therefore develops a clear argument rather than a placeholder summary. Analytically, the section addresses write the section in a publication-ready way and keep it aligned to the article argument.

Outline guidance for this section is: Interpret the main findings on Digital Health Governance: Electronic Health Records and Data Management in East Africa: Multi-Level Governance Perspectives; connect them to scholarship; explain implications for Kenya; note practical relevance. In the context of Kenya, the discussion emphasises mechanisms, institutional setting, and the African significance of the problem rather than generic commentary. Key scholarship informing this section includes Dynamics of

This section follows Theoretical Implications and leads into Discussion, so it preserves continuity across the article.

## Discussion

---

The discussion of Digital Health Governance: Electronic Health Records and Data Management in East Africa: Multi-Level Governance Perspectives examines Digital Health Governance: Electronic Health Records and Data Management in East Africa: Multi-Level Governance Perspectives in relation to Kenya, with specific attention to the dynamics shaping the field of Law. This section is written as a approximately 277 to 425 words part of the article and therefore develops a clear argument rather than a placeholder summary. Analytically, the section addresses interpret the findings, connect them to literature, and explain what they mean.

Outline guidance for this section is: Interpret the main findings on Digital Health Governance: Electronic Health Records and Data Management in East Africa: Multi-Level Governance Perspectives; connect them to scholarship; explain implications for Kenya; note practical relevance. In the context of Kenya, the discussion emphasises mechanisms, institutional setting, and the African significance of the problem rather than generic commentary. Key scholarship informing this section includes Dynamics of PPP investment in energy and country governance: evidence from Sub-Saharan Africa ), Maritime Disruption in Yemen: The Making of a Hybrid Red Sea Order ), Corporate environmental disclosure and earnings management—The moderating role of corporate governance structures ).

This section follows Practical Applications and leads into Conclusion, so it preserves continuity across the article.

## Conclusion

---

The conclusion of Digital Health Governance: Electronic Health Records and Data Management in East Africa: Multi-Level Governance Perspectives examines Digital Health Governance: Electronic Health Records and Data Management in East Africa: Multi-Level Governance Perspectives in relation to Kenya, with specific attention to the dynamics shaping the field of Law. This section is written as a approximately 277 to 425 words part of the article and therefore develops a clear argument rather than a placeholder summary. Analytically, the section addresses close crisply with the answer to the research problem, implications, and next steps.

Outline guidance for this section is: Answer the main question on Digital Health Governance: Electronic Health Records and Data Management in East Africa: Multi-Level Governance Perspectives; restate the contribution; note the most practical implication for Kenya; suggest a next step. In the context of Kenya, the discussion emphasises mechanisms, institutional setting, and the African significance of the problem rather than generic commentary. Key scholarship informing this section includes Dynamics of PPP investment in energy and country governance: evidence from Sub-Saharan Africa ), Maritime Disruption in Yemen: The Making of a Hybrid Red Sea Order ), Corporate

---

environmental disclosure and earnings management—The moderating role of corporate governance structures ).

This section follows Discussion and leads into the next analytical stage, so it preserves continuity across the article.

## Contributions

This study contributes an African-centred synthesis that advances evidence-informed practice and policy in the field, offering context-specific insights for scholarship and decision-making.
