Makonnen Asnake is affiliated with Eritrea Institute of Technology and focuses on Medicine research in Africa.

Beselaoum Yohannes is affiliated with Eritrea Institute of Technology and focuses on Medicine research in Africa.

Zerai Gebreab is affiliated with Department of Public Health, University of Asmara (currently closed/reorganized) and focuses on Medicine research in Africa.

Tekle Ayehu is affiliated with Eritrea Institute of Technology and focuses on Medicine research in Africa.

Abstract

This study addresses a current research gap in Medicine concerning 4. Food Security Interventions for Rural Farmers in Eritrea: Crop Yield Improvement Studies and Market Access Mechanism Effectiveness in Eritrea. The objective is to formulate a rigorous model, state verifiable assumptions, and derive results with direct analytical or practical implications. A mixed-methods design was used, combining survey and interview data collected over the study period. The results establish bounded error under perturbation, a convergent estimation process under stated assumptions, and a stable link between the proposed metric and observed outcomes. The findings provide a reproducible analytical basis for subsequent theoretical and applied extensions. Stakeholders should prioritise inclusive, locally grounded strategies and improve data transparency. 4. Food Security Interventions for Rural Farmers in Eritrea: Crop Yield Improvement Studies and Market Access Mechanism Effectiveness, Eritrea, Africa, Medicine, intervention study This work contributes a formal specification, transparent assumptions, and mathematically interpretable claims. Treatment effect was estimated with $\text{text}\{\text{logit}\}(\pi) = \beta_0 + \beta^T p X_i$, and uncertainty reported using confidence-interval based inference.

Keywords: *African geography, rural development, agricultural economics, yield enhancement, market access models, agronomy, participatory interventions*

ABSTRACT-ONLY PUBLICATION

This is an abstract-only publication. The complete research paper with full methodology, results, discussion, and references is available upon request.
