Kabwira Gitonga is affiliated with Pwani University and focuses on Medicine research in Africa.

Nyarangi Okeyo is affiliated with Strathmore University and focuses on Medicine research in Africa.

Mutua Orina is affiliated with Kenya Agricultural and Livestock Research Organization (KALRO) and focuses on Medicine research in Africa.

Oginga Mburu is affiliated with Strathmore University and focuses on Medicine research in Africa.

Abstract

Maternal health outcomes in urban Kenyan clinics have been a subject of interest for researchers aiming to improve healthcare delivery and outcomes. Data was collected from clinic records, analysed using logistic regression models with robust standard errors to account for potential confounders. Analysis revealed a significant difference (OR = 1.25; 95% CI: 1.04-1.48) in maternal complications between male and female patients at the clinics. Gender-specific healthcare interventions are needed to address disparities observed. Clinics should implement gender-sensitive protocols to improve maternal health outcomes.
