Author notes

Georgina Johnson is affiliated with Department of Civil Engineering, University of Eswatini (UNESWA) and focuses on Engineering research in Africa.

Miss Lynda Smith is affiliated with University of Eswatini (UNESWA) and focuses on Engineering research in Africa.

Dr Marilyn Smith is affiliated with Department of Civil Engineering, University of Eswatini (UNESWA) and focuses on Engineering research in Africa.

Abstract

This study addresses a current research gap in Engineering concerning Sustainable Approaches to Engineering in Southern Africa in Eswatini. The objective is to clarify key debates, identify practical implications, and outline a focused agenda for scholarship and policy. A qualitative approach was used, drawing on recent literature and policy sources to frame the analysis. The analysis indicates persistent structural constraints alongside emerging local innovations; however, evidence remains uneven across contexts and sectors. The paper argues for context-specific approaches and stronger empirical foundations in future research. Stakeholders should prioritise inclusive, locally grounded strategies and improve data transparency. Sustainable Approaches to Engineering in Southern Africa, Eswatini, Africa, Engineering, methodology paper This structured abstract provides a standardised summary to support rapid screening, indexing, and assessment of scholarly contribution.

Keywords: *Sustainable Approaches to Engineering in Southern Africa, Eswatini, Africa, Engineering*
