Author notes

Charles Gould-Russell is affiliated with Department of Mechanical Engineering, University of Monastir and focuses on Engineering research in Africa.

Dr Melanie Todd is affiliated with Tunis Business School (TBS) and focuses on Engineering research in Africa.

Abstract

This study addresses a current research gap in Engineering concerning The Role of Youth in Engineering in Africa in Tunisia. The objective is to clarify key debates, identify practical implications, and outline a focused agenda for scholarship and policy. A qualitative approach was used, drawing on recent literature and policy sources to frame the analysis. The analysis indicates persistent structural constraints alongside emerging local innovations; however, evidence remains uneven across contexts and sectors. The paper argues for context-specific approaches and stronger empirical foundations in future research. Stakeholders should prioritise inclusive, locally grounded strategies and improve data transparency. The Role of Youth in Engineering in Africa, Tunisia, Africa, Engineering, data descriptor This structured abstract provides a standardised summary to support rapid screening, indexing, and assessment of scholarly contribution.

Keywords: *The Role of Youth in Engineering in Africa, Tunisia, Africa, Engineering*
