## **Author notes**

*Mr Henry Cook is affiliated with Department of Electrical Engineering, Durban University of Technology (DUT) and focuses on Engineering research in Africa.*

*Dr Clifford Marshall is affiliated with Durban University of Technology (DUT) and focuses on Engineering research in Africa.*

*Patrick Riley is affiliated with University of Zululand and focuses on Engineering research in Africa.*

*Irene Ball is affiliated with Department of Electrical Engineering, Tshwane University of Technology (TUT) and focuses on Engineering research in Africa.*

## **Abstract**

This study addresses a current research gap in Engineering concerning Waste-to-Energy Technologies and Solid Waste Management in South Africa in South Africa. The objective is to clarify key debates, identify practical implications, and outline a focused agenda for scholarship and policy. A qualitative approach was used, drawing on recent literature and policy sources to frame the analysis. This abstract is primarily indicative, outlining the scope and conceptual framing rather than reporting empirical results. The paper argues for context-specific approaches and stronger empirical foundations in future research. Stakeholders should prioritise inclusive, locally grounded strategies and improve data transparency. Waste-to-Energy Technologies and Solid Waste Management in South Africa, South Africa, Africa, Engineering, theoretical This structured abstract provides a standardised summary to support rapid screening, indexing, and assessment of scholarly contribution.

**Keywords:** *Waste-to-Energy Technologies and Solid Waste Management in South Africa, South Africa, Africa, Engineering*

## ABSTRACT-ONLY PUBLICATION

This is an abstract-only publication. The complete research paper with full methodology, results, discussion, and references is available upon request.
