## Abstract

This study addresses a current research gap in Engineering concerning Climate-Resilient Infrastructure Design for Urban Drainage Systems in Coastal Ghana in Ghana. The objective is to clarify key debates, identify practical implications, and outline a focused agenda for scholarship and policy. A policy analysis was undertaken using national and regional policy documents relevant to the study scope. The analysis indicates persistent structural constraints alongside emerging local innovations; however, evidence remains uneven across contexts and sectors. The paper argues for context-specific approaches and stronger empirical foundations in future research. Stakeholders should prioritise inclusive, locally grounded strategies and improve data transparency. Climate-Resilient Infrastructure Design for Urban Drainage Systems in Coastal Ghana, Ghana, Africa, Engineering, policy analysis This structured abstract provides a standardised summary to support rapid screening, indexing, and assessment of scholarly contribution.
