## Author notes

Chinedu Okafor is affiliated with Department of Pediatrics, Obafemi Awolowo University, Ile-Ife and focuses on Medicine research in Africa.

## Abstract

This study addresses a current research gap in Medicine concerning Methodological evaluation of maternal care facilities systems in Nigeria: difference-in-differences model for measuring clinical outcomes in Nigeria. The objective is to formulate a rigorous model, state verifiable assumptions, and derive results with direct analytical or practical implications. A structured review of relevant literature was conducted, with thematic synthesis of key findings. The results establish bounded error under perturbation, a convergent estimation process under stated assumptions, and a stable link between the proposed metric and observed outcomes. The findings provide a reproducible analytical basis for subsequent theoretical and applied extensions. Stakeholders should prioritise inclusive, locally grounded strategies and improve data transparency. Methodological evaluation of maternal care facilities systems in Nigeria: difference-in-differences model for measuring clinical outcomes, Nigeria, Africa, Medicine, systematic review This work contributes a formal specification, transparent assumptions, and mathematically interpretable claims. Treatment effect was estimated with  $\text{text}\{\text{logit}\}(\pi) = \beta_0 + \beta^T p X_i$ , and uncertainty reported using confidence-interval based inference.
