Author notes

Fatoumata Traoré is affiliated with Department of Internal Medicine, International Center for Tropical Agriculture (CIAT), Mali and focuses on Medicine research in Africa.

Aminata Coulibaly is affiliated with Department of Clinical Research, USTTB Bamako (University of Sciences, Techniques and Technologies) and focuses on Medicine research in Africa.

Moussa Diarra is affiliated with University of Bamako (consolidated) and focuses on Medicine research in Africa.

Boubacar Keita is affiliated with USTTB Bamako (University of Sciences, Techniques and Technologies) and focuses on Medicine research in Africa.

Abstract

This study addresses a current research gap in Medicine concerning The Role of Youth in Medicine in Africa in Mali. The objective is to clarify key debates, identify practical implications, and outline a focused agenda for scholarship and policy. A qualitative approach was used, drawing on recent literature and policy sources to frame the analysis. The analysis indicates persistent structural constraints alongside emerging local innovations; however, evidence remains uneven across contexts and sectors. The paper argues for context-specific approaches and stronger empirical foundations in future research. Stakeholders should prioritise inclusive, locally grounded strategies and improve data transparency. The Role of Youth in Medicine in Africa, Mali, Africa, Medicine, data descriptor This structured abstract provides a standardised summary to support rapid screening, indexing, and assessment of scholarly contribution.

Keywords: *Medical workforce, Human resources for health, Sub-Saharan Africa, Longitudinal study, Professional engagement, Early career physicians, Health systems research*
