Author notes

Aisha Al-Mansouri is affiliated with Department of Surgery, Benghazi University and focuses on Medicine research in Africa.

Khalid El-Huni is affiliated with Department of Public Health, Omar Al-Mukhtar University, Al Bayda and focuses on Medicine research in Africa.

Fatima Al-Tawil is affiliated with University of Tripoli and focuses on Medicine research in Africa.

Omar Ben Ghalbon is affiliated with Benghazi University and focuses on Medicine research in Africa.

Abstract

This study addresses a current research gap in Medicine concerning The Role of Youth in Medicine in Africa in Libya. The objective is to clarify key debates, identify practical implications, and outline a focused agenda for scholarship and policy. A mixed-methods design was used, combining survey and interview data collected over the study period. The analysis indicates persistent structural constraints alongside emerging local innovations; however, evidence remains uneven across contexts and sectors. The paper argues for context-specific approaches and stronger empirical foundations in future research. Stakeholders should prioritise inclusive, locally grounded strategies and improve data transparency. The Role of Youth in Medicine in Africa, Libya, Africa, Medicine, mixed methods study This structured abstract provides a standardised summary to support rapid screening, indexing, and assessment of scholarly contribution.

Keywords: *Mixed Methods, Youth Engagement, Medical Policy, North Africa, Participatory Research, Health Systems*
