Abstract

This study addresses a current research gap in Medicine concerning Empirical Analysis of Key Issues in African Medicine in Algeria. The objective is to clarify key debates, identify practical implications, and outline a focused agenda for scholarship and policy. A mixed-methods design was used, combining survey and interview data collected over the study period. The analysis indicates persistent structural constraints alongside emerging local innovations; however, evidence remains uneven across contexts and sectors. The paper argues for context-specific approaches and stronger empirical foundations in future research. Stakeholders should prioritise inclusive, locally grounded strategies and improve data transparency. Empirical Analysis of Key Issues in African Medicine, Algeria, Africa, Medicine, mixed methods study This structured abstract provides a standardised summary to support rapid screening, indexing, and assessment of scholarly contribution.

Keywords: *Mixed Methods Research, African Medicine, Empirical Analysis, Healthcare Systems, Algeria, Qualitative Inquiry, Quantitative Analysis*
