Frank Lynch is affiliated with Department of Pediatrics, Lusíada University of Guinea-Bissau and focuses on Medicine research in Africa.

Mary Webb is affiliated with AECAR - Higher School of Commerce, Administration and International Relations and focuses on Medicine research in Africa.

Abstract

This study addresses a current research gap in Medicine concerning Digitalization and Medicine in Urban Africa in Guinea-Bissau. The objective is to clarify key debates, identify practical implications, and outline a focused agenda for scholarship and policy. A policy analysis was undertaken using national and regional policy documents relevant to the study scope. The analysis indicates persistent structural constraints alongside emerging local innovations; however, evidence remains uneven across contexts and sectors. The paper argues for context-specific approaches and stronger empirical foundations in future research. Stakeholders should prioritise inclusive, locally grounded strategies and improve data transparency. Digitalization and Medicine in Urban Africa, Guinea-Bissau, Africa, Medicine, policy analysis This structured abstract provides a standardised summary to support rapid screening, indexing, and assessment of scholarly contribution.

Keywords: *Digitalization and Medicine in Urban Africa, Guinea-Bissau, Africa, Medicine*
