*Albert Bennett is affiliated with Department of Internal Medicine, Joseph Ki-Zerbo University, Ouagadougou and focuses on Medicine research in Africa.*

*Gary Morgan is affiliated with International Institute for Water and Environmental Engineering (2iE) and focuses on Medicine research in Africa.*

*Miss Gemma Davison is affiliated with Institut de Recherche en Sciences de la Santé (IRSS) and focuses on Medicine research in Africa.*

### Abstract

This study addresses a current research gap in Medicine concerning Exploring Innovative Approaches to Medicine in Sub-Saharan Africa in Burkina Faso. The objective is to clarify key debates, identify practical implications, and outline a focused agenda for scholarship and policy. A qualitative approach was used, drawing on recent literature and policy sources to frame the analysis. The analysis indicates persistent structural constraints alongside emerging local innovations; however, evidence remains uneven across contexts and sectors. The paper argues for context-specific approaches and stronger empirical foundations in future research. Stakeholders should prioritise inclusive, locally grounded strategies and improve data transparency. Exploring Innovative Approaches to Medicine in Sub-Saharan Africa, Burkina Faso, Africa, Medicine, short report This structured abstract provides a standardised summary to support rapid screening, indexing, and assessment of scholarly contribution.
