## Abstract

This study addresses a current research gap in Medicine concerning Case Study of Medicine Challenges in a Specific African Country in Guinea-Bissau. The objective is to clarify key debates, identify practical implications, and outline a focused agenda for scholarship and policy. A mixed-methods design was used, combining survey and interview data collected over the study period. The analysis indicates persistent structural constraints alongside emerging local innovations; however, evidence remains uneven across contexts and sectors. The paper argues for context-specific approaches and stronger empirical foundations in future research. Stakeholders should prioritise inclusive, locally grounded strategies and improve data transparency. Case Study of Medicine Challenges in a Specific African Country, Guinea-Bissau, Africa, Medicine, survey research This structured abstract provides a standardised summary to support rapid screening, indexing, and assessment of scholarly contribution.
