Author notes

Mrs Ann Roberts is affiliated with University of Antananarivo and focuses on Medicine research in Africa.

Dr Tony Jones is affiliated with Department of Epidemiology, University of Toamasina and focuses on Medicine research in Africa.

Kelly Smith is affiliated with Department of Clinical Research, University of Fianarantsoa and focuses on Medicine research in Africa.

Roy Thompson is affiliated with Department of Public Health, University of Toamasina and focuses on Medicine research in Africa.

Abstract

This study addresses a current research gap in Medicine concerning Empirical Analysis of Key Issues in African Medicine in Madagascar. The objective is to clarify key debates, identify practical implications, and outline a focused agenda for scholarship and policy. A structured review of relevant literature was conducted, with thematic synthesis of key findings. The analysis indicates persistent structural constraints alongside emerging local innovations; however, evidence remains uneven across contexts and sectors. The paper argues for context-specific approaches and stronger empirical foundations in future research. Stakeholders should prioritise inclusive, locally grounded strategies and improve data transparency. Empirical Analysis of Key Issues in African Medicine, Madagascar, Africa, Medicine, scoping review This structured abstract provides a standardised summary to support rapid screening, indexing, and assessment of scholarly contribution.

Keywords: *Empirical Analysis of Key Issues in African Medicine, Madagascar, Africa, Medicine*
