Sophie Burgess-Bentley is affiliated with Department of Public Health, Côte d'Ivoire National Academy of Sciences and focuses on Medicine research in Africa.

Dr Gerard Coleman is affiliated with Department of Clinical Research, Côte d'Ivoire National Academy of Sciences and focuses on Medicine research in Africa.

Albert Graham is affiliated with Department of Epidemiology, Côte d'Ivoire Technical University and focuses on Medicine research in Africa.

Deborah Farrell is affiliated with Côte d'Ivoire National Academy of Sciences and focuses on Medicine research in Africa.

Abstract

This study addresses a current research gap in Medicine concerning Sustainable Development and Medicine in Africa in Côte d'Ivoire. The objective is to clarify key debates, identify practical implications, and outline a focused agenda for scholarship and policy. A qualitative approach was used, drawing on recent literature and policy sources to frame the analysis. The analysis indicates persistent structural constraints alongside emerging local innovations; however, evidence remains uneven across contexts and sectors. The paper argues for context-specific approaches and stronger empirical foundations in future research. Stakeholders should prioritise inclusive, locally grounded strategies and improve data transparency. Sustainable Development and Medicine in Africa, Côte d'Ivoire, Africa, Medicine, replication study This structured abstract provides a standardised summary to support rapid screening, indexing, and assessment of scholarly contribution.

Keywords: *Sustainable Development and Medicine in Africa, Côte d'Ivoire, Africa, Medicine*
