Author notes

Famisa Adekun is affiliated with Department of Surgery, University of Ibadan and focuses on Medicine research in Africa. Gidado Gidado is affiliated with Agricultural Research Council of Nigeria (ARCN) and focuses on Medicine research in Africa.

Abubakar Agbakwiro is affiliated with Agricultural Research Council of Nigeria (ARCN) and focuses on Medicine research in Africa.

Isa Isiugoaju is affiliated with University of Ibadan and focuses on Medicine research in Africa.

Abstract

This study addresses a current research gap in Medicine concerning Community-Based Adolescent Sexual and Reproductive Health Education Programs in Northern Nigeria in Nigeria. The objective is to formulate a rigorous model, state verifiable assumptions, and derive results with direct analytical or practical implications. A structured analytical approach was used, integrating formal modelling with domain evidence. The results establish bounded error under perturbation, a convergent estimation process under stated assumptions, and a stable link between the proposed metric and observed outcomes. The findings provide a reproducible analytical basis for subsequent theoretical and applied extensions. Stakeholders should prioritise inclusive, locally grounded strategies and improve data transparency. Community-Based Adolescent Sexual and Reproductive Health Education Programs in Northern Nigeria, Nigeria, Africa, Medicine, protocol This work contributes a formal specification, transparent assumptions, and mathematically interpretable claims. Treatment effect was estimated with $\text{text}\{ \text{logit} \}(\pi) = \beta_0 + \beta_1 X_i$, and uncertainty reported using confidence-interval based inference.

Keywords: African Geography, Adolescence, Community Health Education, Sexual Health, Reproductive Health, Intervention Studies, Qualitative Research
